

# How Bare Nut Butter saves 40+ hours per month on fulfillment with Red Stag

A premium nut butter manufacturer transforms their fulfillment operation from constant crisis to competitive advantage with Red Stag Fulfillment.

## The challenge

Multiple 3PLs failed Bare Nut Butter with poor shipping, mismanaged inventory, and unreliable operations, creating:

- High damage rates with \$10,000+ in unrecovered losses
- 10+ hours weekly spent monitoring fulfillment
- Constant inventory discrepancies and billing errors
- Risk to valuable B2B customer relationships

*We lost \$10,000 in damaged products, spent 10 hours a week chasing problems, and couldn't get our previous 3PL to even return our calls. Every day was a new crisis that threatened our business relationships.*

**Sarah, Founder**

*The difference with Red Stag is night and day. Our damage rates are extremely low with 15-pound fragile products, they catch problems before they affect customers, and issues are handled immediately. No more chasing people for weeks to get answers.*

**Sarah**

## The solution

Red Stag delivered a complete fulfillment transformation:

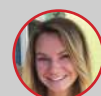

- Expert handling of heavy, fragile products with custom protocols
- True inventory transparency with real-time tracking
- Proactive support with direct access to operations team
- Clear documentation and simple verification of all costs

## The results

- ✓ 3PL management time reduced from 10+ hours to 1 hour weekly
- ✓ Near-zero damage rates on fragile 15-pound products
- ✓ Eliminated all inventory and billing discrepancies
- ✓ Protected valuable B2B relationships

*Other 3PLs told us our damage rates were 'normal' for heavy products. Red Stag proved that with the right processes and care, you can achieve near-perfect fulfillment even with challenging products.*
